## Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the

application:

## Listing of Claims:

1. (Currently Amended) A method allowing a customer to a printing service provider

to create a PDF document ~~at the site of the customer~~ through a computerized interface and

~~sending~~ send the PDF document to the service provider through a network for data-

communication, whereby the service provider directs the PDF document to a suitable printing

office through a network for data-communication, comprising:

generating, by ~~that~~ a PDF engine ~~creating documents uses~~ using first and second

XML files, ~~to create~~ a customer PDF document for printing on demand; wherein

the first XML file comprises ~~the~~ data and its ~~typing~~ data type for printing

which is created by the customer through said interface;

the second XML file comprises a description of how said data ~~can~~ is to be

positioned and formatted, in a created document by the customer through said interface;

wherein said PDF document generating comprises ~~engine generating said document~~

~~through providing a new structure by~~ analyzing the first and second XML files, ~~while~~

~~analyzing~~ merging data, and formatting information; ~~and~~

wherein the PDF document generated using the first and second XML files is

generated at the site of the customer; and

~~thus making it possible to create a PDF document with a distinct difference between~~

wherein the data ~~to be printed~~ for printing and the design of the PDF document differ.

2. (Original)  A method according to claim 1, wherein high-resolution images, fonts and color definitions are embedded in the PDF document.

3. (Currently Amended)  A method according to claim 1, wherein an arbitrary printing office that can be used for online printing is provided.

4. (Currently Amended)  A method according to claim 1, wherein the second XML file describes the a layout of the whole PDF document.

5. (Currently Amended)  A method according to claim 1, wherein a questionnaire based on non-static text elements in the second XML file[[,]] is created.

6. (Previously Presented)  A method according to claim 1, wherein every non-static text element in the second XML file has a reference to data in the first XML file.

7. (Currently Amended)  A method system allowing a customer to a printing service provider to create a PDF document at the site of the customer through a computerized interface and sending send the PDF document to the service provider through a network for data-communication, whereby the service provider directs the PDF document to a suitable printing office through a network for data-communication, comprising:

a PDF engine creating documents that uses configured to create, using first and second XML files, to create a customer PDF document for printing on demand; wherein

the first XML file comprises ~~the~~ data and its ~~typing~~ data type for printing

which is created by the customer through said interface;

the second XML file comprises a description of how said data ~~can~~ is to be

positioned and formatted, in a created document by the customer through said interface;

wherein said PDF engine ~~generating said document through providing a new structure~~

~~by analyzing~~ is configured to analyze the first and second XML files, ~~while analyzing~~

~~merging~~ merge data, and ~~formatting~~ format information; ~~and~~

wherein the PDF document generated using the first and second XML files is

generated at the site of the customer; and

~~thereby enabling creation of a PDF document with a difference between~~ wherein the

data ~~to be printed~~ for printing and the design of the PDF document differ.

8. (Original) A system according to claim 7, wherein high-resolution images, fonts

and color definitions are embedded in the PDF document.

9. (Currently Amended) A system according to claim 7, wherein an arbitrary printing

office ~~can be~~ is used for online printing.

10. (Currently Amended) A system according to claim 7, wherein the second XML

file describes ~~the~~ a layout of the whole PDF document.

11. (Currently Amended) A system according to claim 7, wherein a questionnaire

based on non-static text elements in the second XML file[[,]] is created.

12. (Previously Presented)  A system according to claim 7, wherein every non-static text element in the second XML file has a reference to data in the first XML file.
